

About me

Hi My name is Panuwit Anananusit my nick name is Fluke. I am 20 years old. I am currently a third-year student at King Mongkut's University of Technology Thonburi (KMUTT), Faculty of Science, Department of Physics, majoring in Physics Materials, and Medical Instrumentation.

095-481-1903

panuwitfluk

Technical skills

- Basic Electronic Circuit Design
- Arduino-Based System Development
- Sensor Applications
- Basic Medical Instrumentation Knowledge
- Medical Equipment Preventive Maintenance
- Fundamental Materials Science
- Vacuum Technology
- Thin Film Technology
- Sputtering Technology
- System Design and Planning
- Experimental Design

Soft skills

- Communication skills
- Coordination skills
- Presentation skills
- Active Listening skills
- Organizational Skills
- Interpersonal Skills

Interests

- Medical equipment
- Application of Materials
- Materials combines
- PCB designs
- Industrial processes

Hobbies

- Badminton
- Basketball
- Table tennis

My Project & My Experience

1st years: A Pulse Oximeter prototype based on the Principle of light reflection by using an Arduino board

-Applied optical sensing principles to develop a prototype using an Arduino board.Participated in circuit assembly and system development. Studied the principles of light absorption and reflection for blood oxygen saturation measurement.

2nd years : Application of a Thermistor and an Operational Amplifier in Temperature Measurement and Alert System project.

-Participated in electronic circuit design and system planning. Developed a system flowchart to illustrate the operating process. Studied the application of temperature sensors and signal conditioning circuits.

2nd years : Preventive Maintenance of Medical Equipment

-Participated in an off-campus medical equipment preventive maintenance activity.Gained practical exposure to medical equipment inspection and maintenance procedures.Observed the importance of equipment maintenance in ensuring operational reliability and safety.

3rd years : International Academic Training at Tianjin normal University China

-Participated in an academic training program at Tianjin Normal University, China.Gained exposure to Vacuum Technology and Thin Film Deposition.Studied the fundamental principles and applications of Sputtering Technology.Explored the potential applications of thin film technology in advanced materials, electronic devices, and medical instruments.

3rd years : Medical Instrumentation Training at Chritian University

-Participated in training sessions on the operation and fundamental principles of medical instruments.Gained basic knowledge of medical equipment functionality and measurement

Extracuricular Activities & Social Activities :

- 1st &2nd years :Physics Volunteers activities and others
- 1st ,2nd ,3rd years :Blood donations 2times/years
- Assistaant Art Teacher : At Allie art Studio about 2years
- Badminton competitions :Freedom badminton
- Drummer for a recreational band
- Served as a booth providing information about physics
- Basic Calculus Tutoring for 1st year students
